Orthopaedics is a major area of expertise at HMC and the Clinic has a vibrant orthopaedic practice. Our consultants provide services in all aspects of orthopaedic surgery, from minimally invasive joint, hip and knee replacement to ankle, shoulder procedures and foot surgery.

The orthopaedic service at HMC offers a multidisciplinary approach to care including consultant orthopaedic surgeons, clinical nurse specialists, a physiotherapy team and other allied health professionals.

Along with two dedicated state-of-the-art orthopaedic operating theatres with full laminar air flow, enabling skilled surgeons to perform all orthopaedic surgery, HMC also offers a comprehensive diagnostic imaging department, which provides a service across a range of modalities including MRI, CT and Digital X-Ray. The Clinic also offers an interventional radiology service for orthopaedic patients who may require it.
Please note that if you are referring for an orthopaedic consult, in order to facilitate a speedy response, the following x-rays should be ordered in advance of the actual appointment.

**Hip:** AP Pelvis, lateral of affected hip

**Knee:** Weight bearing AP, flexion lateral, Rosenberg and Merchant views

**Foot:** Always weight bearing – AP, lateral, axial

**Spine:** AP, lateral and lateral oblique

**Wrist:** AP, lateral, radial/ulnar deviation views and clenched fist in supination

The Diagnostic Imaging Department at the Hermitage Medical Clinic can be contacted on 01 6459042 or fax 01 6459128 to organise appointments.
