EMERGENCY DEPARTMENT

Our Emergency Department is an immediate access clinic run by Consultants.

We can provide you with:

- **Immediate access to a Consultant's opinion**
- **Same day investigations**
- **Immediate management plan**
- **Prompt discharge letter**

Cardiology, General Surgery, Medical, Orthopaedic and Urology patients can be seen at the Emergency Department.

If you wish to refer a patient to the Emergency Department please phone 1800 645 999 in advance to speak to a member of our medical team. Your patient will be allocated the next available appointment time, however urgent cases will be prioritised and will be seen as soon as possible.

The introduction of these changes will ensure that upon your arrival at the Emergency Department you will be attended to immediately. This will minimise your stay in the Department and will limit your interaction with other patients and staff, thereby respecting social distancing as much as possible. This is the best way to keep you safe.

We will also endeavour to communicate the outcome of each patient's visit to the referring GP the following day. This can be done by phone, fax or email and the department will work with each GP to tailor this response to accommodate the need of their individual practices.

Telephone: 1800 645 999
Open 6 days a week: Mon-Fri: 8am-5pm
(excluding Bank Holidays)

How much will it cost?

All patients presenting to the Emergency Department will be charged €190 regardless of their insurance cover. Additional tests such as bloods and x-rays will be extra (for individual rates please consult our Emergency Department administrator at 01-6459016) Should a patient be admitted than the Health Insurer may cover all

costs EXCEPT the initial €190 consultation fee. The Hermitage Emergency Department have a capped amount spend of €560 for outpatient services (i.e. this is the most you will pay, irrespective of how many tests are carried out). This cap may exclude CT and MRI scans, where a direct settlement arrangement may exist with your Private Health Insurer.

CARDIOLOGY

CARDIOLOGY DEPARTMENT

Our specialist department is staffed by a very experienced, enthusiastic team of Cardiac Physiologists who believe in a patient focused, high quality and efficient service. Our department is currently open from 9am to 5pm Monday to Friday (GP direct access). We are happy to facilitate your patients with a routine appointment within a week and same day testing for urgent referrals.

Cardiology tests include:

- Resting ECG
- Exercise stress testing
- Echocardiography including bubble, 3D and contrast studies
- Transoesophageal echocardiography (on a daycase basis)
- Ambulatory 24 hour BP monitors
- Ambulatory 24 and 48 hour Holter monitors
- Event monitors (1 week)
- Pacemaker follow-up*
- Defibrillator (ICD) follow-up*
- Loop recorder download*

**We also offer a remote care service for following up devices*

CHEST PAIN SERVICE

Service Criteria:

- Non-acute chest pain
- Patients with multiple risk factors
- Patients with palpitations

Contact: Colm Patton, Clinical Nurse Specialist, Cardiology

CONSULTANT CARDIOLOGIST TEAM

The Cardiology service is proud to have a dedicated Consultant team which includes:

- Dr John Clarke
- Dr Peter Crean
- Dr Iftikhar Khan
- Dr Tora Leong
- Dr Bryan Loo
- Dr Jonathan Lyne
- Dr Vincent Maher
- Prof Brendan McAdam
- Dr David Moore
- Dr David Mulcahy
- Dr Richard Sheahan

CARDIAC CATHETERISATION LABORATORY

The cardiac cath lab is a state of the art facility with a full range of services for performing a comprehensive list of diagnostic and interventional procedures which include:

Telephone: 01 – 645 9450/9994
Fax: 01 – 645 9451
Email: cardiology@hermitageclinic.ie
Chest Pain Service
Tel: 01 6459699
Email: chestpainservice@hermitageclinic.ie

Coronary Angiogram

Percutaneous coronary stenting – including a full range of complex procedures e.g. multivessel, left main, chronic occlusions etc.

FFR, IVUS & OCT – new technologies that use intracoronary pressure wire/ultrasound/infrared waves, to enhance angiography in the definitive diagnosis of significant Coronary artery disease, or for exclusion of same. Also helps in proper alignment of Stents.

Device Implantation – Loop recorders, pacemakers and defibrillators including heart failure devices.

Electrophysiology Studies and Ablation Therapy – for rhythm disturbances.

Percutaneous Transcatheter Septal Closures – Patent Foramen Ovale, Atrial Septal Defects, Patent Ductus Arteriosus etc.

D/C Cardioversion and TOE

PHYSIOTHERAPY

The Hermitage Medical Clinic provides a patient focused physiotherapy service that is centred on best evidence based practice to provide high quality patient care.

We are a state-of-the-art rehabilitation service providing the following:

- GP Direct Access Outpatient Service
- Neck and Back Rehabilitation
- Sports & Orthopaedic Rehabilitation
- Rheumatology and Arthritis Service
- Post-Operative Care
- Lymphoedema Services and Lymphoedema Care
- Hand Therapy
- Men's / Women's Health
- Inpatient and Outpatient Respiratory Physiotherapy
- Occupational Health
- Medico-Legal / Insurance Services
- Inpatient and Outpatient Neurological Rehabilitation
- Orthotic Prescription and Biomechanical Evaluation

We utilise a multi-disciplinary approach to assess, advise and provide a full range of care using:

- Soft Tissue Techniques
- Joint Mobilisation
- Electrotherapy
- Personalised Exercise Programmes
- Patient Advice and Education
- Equipment Provision
- Manual Therapy
- Acupuncture / Dry Needling

Our programmes aim to restore and increase your level of health and fitness to enhance your safe return to work, sport and recreation.

POST OPERATIVE LUMBAR PILATES, TOTAL HIP AND KNEE REPLACEMENT CLASSES

If you would like further information please contact Physiotherapy Department directly.

ONCOLOGY & HAEMATOLOGY

The Hermitage Medical Clinic is particularly committed to the provision of cancer services. The hospital has first class Consultant expertise in the areas of Medical, Surgical and Radiation Oncology supported by excellent Nursing and Allied Health professionals.

The Oncology Day Unit at the HMC, incorporating a Haematology Clinic, has been in operation since January 2008. Currently the medical oncology team consists of Consultant Oncologists, Prof Kennedy and Prof Gallagher; two Consultant Haematologists, Dr. Thornton and Dr. Murphy and Dr O'Siorain who runs palliative medicine.

NEUROPHYSIOLOGY DEPARTMENT

The Neurophysiology department provides diagnostic testing for seizures, encephalopathy/confusion, non epileptic seizures, carpal tunnel syndrome, poly-neuropathy, compression neuropathies, radiculopathy, myopathy, neuromuscular junction disorders, autonomic disorders, multiple sclerosis (evoked potentials) and trigeminal disorders.

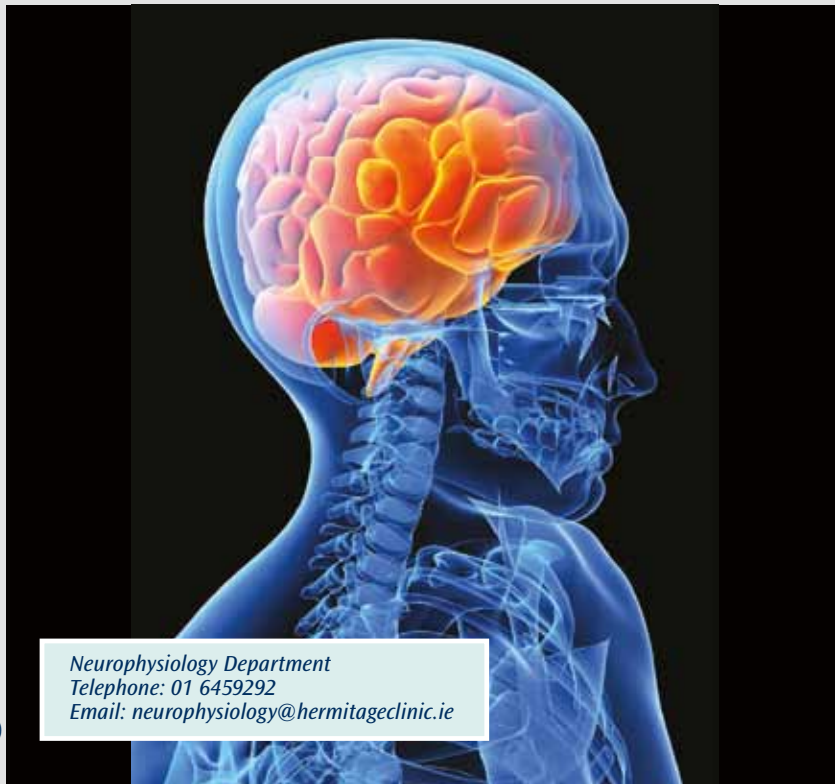

Details of specific tests available include:

- Routine EEG's
- Sleep Deprived EEG's
- Telemetry Studies
- Testing for Carpal Tunnel Syndrome (NCS)
- Upper and lower limb nerve conduction studies (NCS)
- EMG clinics
- Repetitive stimulation (testing for Neuromuscular junction disorders)
- Blink responses (assessment of trigeminal nerves)

We have recently added:

- Visual evoked responses (test for optic neuritis and multiple sclerosis)
- Somatosensory evoked responses (spinal cord disorders and multiple sclerosis)

We have a MS Clinical Nurse Specialist at the Hermitage Medical Clinic who liaises closely with the Neurologists providing a multidisciplinary treatment approach for MS patients attending the hospital.

RESPIRATORY DEPARTMENT

The Respiratory / Sleep Studies Department provides:

Pulmonary Function Tests: used to confirm the diagnosis of a respiratory disease, track disease progression and enable clinicians assess a patient's response to therapy. We provide a comprehensive range of testing including

Spirometry +/- reversibility, Diffusion Capacity (DLCO), Lung volumes (HE dilution/body plethysmography) and Muscle strength testing (MIPS/MEPS/SNIP). Tests are reported on by a Respiratory Physician and are available in <1week, although preliminary reports are available instantaneously.

Mannitol Challenge Test: used to confirm a diagnosis of Asthma where there is a diagnostic uncertainty. Challenge tests are by Respiratory Consultant referral only.

Skin Allergy Tests: Skin Prick testing is used for the diagnosis of an allergic disease. The skin prick test has a good sensitivity and specificity for the presence of allergen specific IgE and is the primary mode of skin testing for immediate IgE mediated allergy. Small amount of allergens are introduced into the epidermis. Allergens include ; pollen, dusts, animal dander, moulds.

Sleep Studies: Nocturnal Polysomnography (PSG) is the gold standard for overnight sleep assessments. The PSG is performed as an inpatient in the hospital. It measures sleep cycles, sleep stages and respiratory effort by recording brain waves (EEG), electrical activity of muscles (EMG), eye movement (EOG), breathing rate, blood oxygen saturation (SpO2), heart rhythm (ECG), snore, airflow and leg movements. The study are analysed by the Clinical Physiologist and reported by the Respiratory Physician.
