

Nurse Graduate Development Programme 2017/18

www.hermitageclinic.ie

Course Overview

This course aims to provide education and learning opportunities to the newly qualified staff nurse. Candidates will experience a supportive clinical environment that facilitates the transition from novice to expert. The course aims to develop the skills required in nurse practice today. The programme modules rotate across a number of clinical areas.

Learning Outcomes

At the end of this course candidates will be able to

- Define the role of staff nurse within an acute hospital and identify the responsibilities for that role
- Perform effectively as a team member with a focus on patient safety and time management
- Demonstrate enhanced skills in patient assessment and patient management.
- Demonstrate enhanced skills in Medication Management including Administration of Medication
- Use a wide range of communication skills that will facilitate effective team dynamics

Target Audience

Newly qualified Registered General Nurses

“ The Hospital is quite diverse and I gained so much experience in many different areas.

Course Participant 2016

“ The programme allowed me to join the nursing team in the Emergency Department. This is an area that I loved during my training.

Course Participant 2016

Assessment

- As formative assessment each candidate must keep a reflective learning Journal.
- Summative assessment is a patient case study including an account of the nursing care given and rationale for that care pathway.
- To successfully complete the programme each candidate must achieve clinical competencies outlined at the start of the course.

Methodology

A variety of teaching styles will be utilised during the programme including visual learning, workbooks, reflective practice and problem based learning.

Certification

The Course is approved by the Nursing & Midwifery Board with CEU's available for each module.

Delivery

The course will be delivered over 12 months.

With over 150 hours of class room time that is supported by clinical practice in various departments.

“ The programme gave me support at the start of my career when I most needed it.
